Subject: Cancellation of Advisory Circular *(AC) 20-43C, Aircraft Fuel Control*

Flight Standards Service is requesting the cancellation of *AC 20-43C, Aircraft Fuel Control.*

Following a review by AFS-300 of AC 20-43C, and with input from the Senior Technical Specialist, Aviation Fuels, AIR-602, there are several industry documents, such as ATA103, Energy Institute (EI) EI 1530, and JIG manual 1- 4 that provide similar information. These documents are widely accepted and used by the aviation fuel community and contain at least equivalent, and often more current and technically relevant guidance.

Cancellation of this AC would not have an adverse effect on fuel handling or quality control.

| Number | Date | Document Title | OPR | Reason for Cancellation |
|---|---|---|---|---|
| *AC 20-43C* | *10/20/1976* | *Aircraft Fuel Control* | AFS-300 | *The content in this AC is available in several other industry documents, with equivalent or more current and technical relevant guidance.* |

Should you have any questions or concerns, please contact the Flight Standards Directives Team at: 9-AWA-AFB-120-Directives@faa.gov.
