SAFETY REGULATION INSTRUCTION No. 379*

SUBJECT: Index of Safety Regulation Instructions and Memoranda to Regional Administrators showing Disposition of Each.

The attached index indicates the disposition to be made of currently effective Safety Regulation Instructions and Memoranda to Regional Administrators. In some instances the material has been listed as obsolete and others as superseded by later issues of Safety Regulation Instructions which in turn are superseded by portions of the Manual of Procedure. Some of the material will be picked up in revisions or new issues of Civil Aeronautics Manuals and, where a current Safety Regulation Release contains the same information, reference has been made to that publication.

If you should check the Safety Regulation Instructions and Memoranda to Regional Administrators against the referenced chapters of the Manual of Procedure, you will find many instances where the wording is not exactly the same as in the previous publication. In some cases the material will have been revised to include changes that have occurred since the last publication date. In other cases, like material will have been set forth in slightly different phraseology.

If errors are found, or if you are unable to ascertain the proper method for handling a given problem from the procedures outlined in the new publication, your inquiries should be directed through the usual channels for necessary corrective or interpretive action. Those Safety Regulation Instructions and Memoranda to Regional Administrators covered in chapters of the Manual of Procedure not yet issued should be retained until the new publication is received.

It is anticipated that the complete manual will be in your hands by September of this year with the major portion of it being distributed prior to June 1, 1948.

A. S. Koch
Assistant Administrator for
Safety Regulation

*Note: SRI No. 379 and MRA No. 153 are the last issues of each series.
