Civil Aeronautics Manual 6

Rotorcraft Airworthiness; Normal Category

Supplement No. 1, CAM 6 dated June 1962 — January 15, 1963

SUBJECT: Revisions to CAM 6

This supplement is issued to incorporate into CAM 6 Civil Air Regulations Amendment 6–6 and revised Appendix A.

Amendment 6–6 concerns master switch requirements. It was issued December 18, 1962, and became effective December 18, 1962.

Appendix A, Main Rotor Service Life Determination, contains those fatigue evaluation procedures which are acceptable methods for determining the service life of main rotors. It was issued on December 10, 1962, and became effective on December 14, 1962.

New or revised material is enclosed in black brackets on the pages submitted with this supplement, except Appendix A and the pages in the addendum containing the preamble of amendments.

Remove the following pages:
41 through 44
53 through 59
P–7 and P–8

Insert the following new pages:
41 through 44
53 through 62
P–7 and P–8
