UNITED STATES OF AMERICA
CIVIL AERONAUTICS BOARD
WASHINGTON, D. C.

Civil Air Regulations Amendment 6-3
Effective: December 7, 1949
Adopted: November 2, 1949

IDENTIFICATION DATA

Part 6 currently requires each aircraft produced thereunder to bear an identification plate containing the information essential for its identification. Under current requirements the identification plate has sometimes been located on the floor of the pilot compartment or in some other place where the identification data may be obliterated in the normal use of the aircraft or destroyed or lost in the event of an accident. In order to facilitate identification of the aircraft, especially in accident investigations, the amendment hereby adopted requires that the identification plate be made of fireproof material and be located in an accessible place where it is not likely to be defaced in the normal use of the aircraft.

In order to make the required data consistent throughout the regulations the amendment further provides that the identification plate shall contain the data required by § 2.36.

Interested persons have been afforded an opportunity to participate in the making of this amendment, and due consideration has been given to all relevant matter presented.

In consideration of the foregoing, the Civil Aeronautics Board hereby amends Part 6 of the Civil Air Regulations (14CFR, Part 6, as amended) effective December 7, 1949:

By amending § 6.61 to read as follows:

6.61 Identification plate. A fireproof identification plate shall be securely attached to the structure in an accessible location where it will not likely be defaced during normal service. The identification plate shall not be placed in a location where it might be expected to be destroyed or lost in the event of an accident. The identification plate shall contain the identification data required by § 2.36.

(Secs. 205 (a), 601, 603; 52 Stat. 984, 1007, 1009; 49 U.S.C. 425 (a), 551, 553)

By the Civil Aeronautics Board:

/s/ M. C. Mulligan

M. C. Mulligan
Secretary
