Civil Aeronautics Manual 20

Pilot and Instructor Certificate

Supplement No. 2, CAM 20 dated Nov. 1, 1959 **Sept. 15, 1961**

SUBJECT: Revisions to CAM 20.

This supplement is issued to incorporate in CAM 20 new Special Civil Air Regulation No. SR-434A, to delete Special Civil Air Regulation No. SR-441 which terminated August 15, 1961, and to revise Appendix A.

Special regulation SR-434A renews the provisions of SR-434 which expired on June 30, 1961. This regulation eliminates the 100-mile solo flight experience requirement for issuance of private pilot certificates on the island of Okinawa, and was issued on September 5, 1961, to become effective on September 9, 1961.

Appendix A is revised to list the current type ratings which the holder of a pilot certificate may be issued upon meeting the flight test standards applicable thereto.

New and revised material is enclosed in black brackets on the pages submitted with this supplement. However, Special Civil Air Regulation No. SR-434A, which is new in its entirely, is not so marked.
