Federal Aviation Administration

Memorandum

Date: MAR 0 6 2017

To: Jeffrey T. Yarnell, Director, Air Traffic Control Facilities and Engineering Services, AJW-2

From: Kathleen Edic, Manager, Environmental and Occupational Safety and Health (EOSH) Services Group, AJW-23

Subject: Cancellation of FAA Order AL 3900.21C, Fire Detection in FAA Living Quarters

Organization AJW-23 requests concurrence for the cancellation of FAA Order AL 3900.21C, Fire Detection Devices in FAA Living Quarters, dated June 9 1993. The subject order prescribes compliance requirements for early detection of fires for Alaskan Region living quarters units.

The EOSH Services Group, on behalf of the legacy organization, Airway Facilities, confirms that the order will not be updated and therefore does not object to its cancellation. The FAA workplace inspection checklist is designed specifically for living quarters and includes the requirement for annual inspection of fire detection devices. Furthermore, requirements contained within Article 53, Section 3 of the National Air Traffic Controllers Association Agreement dictate that the agency will follow local building codes with respect to smoke detectors and sprinkler systems.

We have determined that there is no risk, no hazard change and no impact on the safety of the National Airspace System with the cancellation of this order and therefore no formal safety risk analysis will be performed. All documentation associated with this cancellation will be maintained as a permanent case file for future reference.

Please validate on the appropriate line below that you agree or do not agree to the cancellation of AL 3900.21C.

If you have any questions please contact Kathleen Edic, Group Manager, EOSH Services Group, AJW-23, at (202)-267-7485.

Cancellation Accepted:

Jeffrey T. Yarnell
